Section IV
One-Hundred Year Flood Protection

MODIFIED CONSENT DECREE
SECTION XIX, PARAGRAPH 57d

Paragraph 57d: Requires the Board to annually report on the progress of construction of facilities to protect the East Bank Treatment Plan from a one-hundred (100) year flood.

2012 Work Accomplished:

- Though Sewerage and Water Board Contract #3629, a 4-meg emergency generator for the East Bank plant was procured, manufactured, delivered and installed at a price of $2,759,559.00 in the new Generator Building. Through Contract #3681, the new generator building was constructed at a cost of $7,498,000. The fully functional generator was placed on-line in November 2012.

2013 Work Accomplished

- Through contract #3661, the Board has completed the design phase and awarded a construction contract to raise the berm around East Bank Wastewater Treatment Plant in the amount of $24,391,466.00. The Berm project is 97% complete. Construction will be completed in 2014.

- The Board has met the requirement to provide a report on the progress of construction of facilities to protect the East Bank Plant from a one-hundred year flood.
