SOURCES AND METHODOLOGY

Baseline Population:

The basin-level population counts are based on the 1990, 2000, and 2010 Censuses. The 2018 estimate is based on indicators of residential occupancy throughout the city between 2010 and the fall of 2018. These indicators include new residential activity accounts and inventories of major residential and institutional facilities (redeveloped public housing projects, university campuses, the prison population, etc.) which have come online or added capacity during this period.

Ten- and Twenty-Year Projections:

These projections were developed in early 2019 by demographic analysts at GCR. They are based on the recent property-level occupancy trends described above, analysis of planned residential projects, and major institutional expansions in each neighborhood throughout the city.
